2011 was a common year starting on Saturday of the Gregorian calendar, the 2011th year of the Common Era (CE) and Anno Domini (AD) designations, the 11th year of the 3rd millennium, the 11th year of the 21st century, and the 2nd year of the 2010s decade.

Cosmology, Calendars, and Horizon-Based Astronomy in Ancient Mesoamerica is an interdisciplinary tour de force that establishes the critical role astronomy played in the religious and civic lives of the ancient peoples of Mesoamerica. Providing extraordinary examples of how Precolumbian peoples merged ideas about the cosmos with those concerning calendar and astronomy, the volume showcases the value of detailed examinations of astronomical data for understanding ancient cultures. The volume is divided into three sections: investigations into Mesoamerican horizon-based astronomy, the cosmological principles expressed in Mesoamerican religious imagery and rituals related to astronomy, and the aspects of Mesoamerican calendars related to archaeoastronomy. It also provides cutting-edge research on diverse topics such as records of calendar and horizon-based astronomical observation (like the Dresden and Borgia codices), iconography of burial assemblages, architectural alignment studies,

urban planning, and counting or measuring devices. Contributors—who are among the most respected in their fields—explore new dimensions in Mesoamerican timekeeping and skywatching in the Olmec, Maya, Teotihuacano, Zapotec, and Aztec cultures. It will be of great interest to students and scholars of anthropology, archaeology, art history, and astronomy.

Are we coming to the end of a cosmic cycle? Will there be an age of awakening, or even an end to the world we know? For the first time, the leading authorities on the 2012 phenomenon are all given voice in a single book: *The Mystery of 2012*. From the prophecies of the Mayan astronomers to modern predictions about social, ecological, and spiritual changes to our world, this comprehensive anthology offers you a chance to examine the mystery from every angle—and to decide for yourself whether 2012 will end with a whimper or a bang. Whether you're a skeptic, a true believer, or simply "2012 curious," here is a thought-provoking exploration of this approaching landmark in human history. The book includes essays by the following list of scholars, scientists, philosophers, and cutting-edge thinkers: Arjuna Ardagh, José Argüelles, PhD Gregg Braden, Carl Johan Calleman, PhD Gill Edwards, Jean Houston, PhD Barbara Marx Hubbard, Janosh John Major, Jenkins Lawrence E. Joseph, John Lamb Lash, Ervin Laszlo, Llewellyn Vaughan-Lee, PhD Meg Blackburn Losey, PhD Joanna R. Macy, PhD Karl Maret, MD Corinne McLaughlin, James O'Dea, Christine Page, MD John L. Petersen, Daniel Pinchbeck, Sharron Rose, Peter Russell, Robert K. Sitler, Geoff Stray, Jay Weidner

How the global mind drives the evolution of both consciousness and civilization • Explains how our brains receive consciousness from the global mind, which upgrades human consciousness according to a pre-set divine time frame • Reveals how the Mayan Calendar provides a blueprint for these consciousness downloads throughout history • Examines the mind shift in humans and the development of pyramids and civilization in ancient Egypt, Sumer, South America, and Asia beginning in 3115 BCE In each culture the origins of civilization can be tied to the arising of one concept in the human mind: straight lines. Straight and perpendicular lines are not found in nature, so where did they come from? What shift in consciousness occurred around the globe that triggered the start of rectangular building methods and linear organization as well as written language, pyramid construction, mathematics, and art? Offering a detailed answer to this question, Carl Calleman explores the quantum evolution of the global mind and its holographic resonance with the human mind. He examines how our brains are not thinking machines but individual receivers of consciousness from the global mind, which creates holographic downloads to adjust human consciousness to new cosmological circumstances. He explains how the Mayan Calendar provides a blueprint for these downloads throughout history and how the global mind, rather than the individual, has the power to make civilizations rise and fall. He shows how, at the beginning of the Mayan 6th Wave (Long Count) in 3115 BCE, the global mind gave human beings the capacity to conceptualize spatial relations in terms of straight and perpendicular lines, initiating the building of pyramids and megaliths around the world and leading to the rise of modern civilization. He examines the symbolism within the Great Pyramid of Giza and the pyramid at Chichén Itzá and looks at the differences between humans of the 6th Wave in ancient Egypt, Sumer, South America, and Asia and the cave painters of the 5th Wave. He reveals how the global mind is always connected to the inner core of the Earth and discusses how the two halves of the brain parallel the civilizations of the East and West. Outlining the historical, psychological, geophysical, and neurological roots of the modern human mind, Calleman shows how studying early civilizations offers a means of understanding the evolution of consciousness.

In 1972, the U.S. Supreme Court handed down a 5 – 4 verdict in *Milliken v. Bradley*, thereby blocking the state of Michigan from merging the Detroit public school system with those of the surrounding suburbs. This decision effectively walled off underprivileged students in many American cities,

condemning them to a system of racial and class segregation and destroying their chances of obtaining a decent education. In *Hope and Despair in the American City*, Gerald Grant compares two cities—his hometown of Syracuse, New York, and Raleigh, North Carolina—in order to examine the consequences of the nation's ongoing educational inequities. The school system in Syracuse is a slough of despair, the one in Raleigh a beacon of hope. Grant argues that the chief reason for Raleigh's educational success is the integration by social class that occurred when the city voluntarily merged with the surrounding suburbs in 1976 to create the Wake County Public School System. By contrast, the primary cause of Syracuse's decline has been the growing class and racial segregation of its metropolitan schools, which has left the city mired in poverty. *Hope and Despair in the American City* is a compelling study of urban social policy that combines field research and historical narrative in lucid and engaging prose. The result is an ambitious portrait—sometimes disturbing, often inspiring—of two cities that exemplify our nation's greatest educational challenges, as well as a passionate exploration of the potential for school reform that exists for our urban schools today.

This book is one of the first few books written in English on Chaozhou culture and history. It compiles information from Chinese and English sources including archive material, newspapers, academic works and publications. It presents a panorama view of the Teochews in Singapore. The book is divided into three sections. The first section covers the history of Chaozhou, the Chaozhou culture, the Teochew ethnicity and the migration of the Teochew people to Southeast Asia. The second section covers the history, activities and contributions of the Teochews in Singapore from the 19th century. The third section covers core elements of the Chaozhou culture, including customs and practices, cuisine and tea culture, performing arts and craftworks. With carefully selected photos, pictures and comprehensive accounts, this book takes the general readers on a fascinating journey of the Teochew heritage. For those who wish to continue learning more about Chaozhou culture and history, a selected bibliography is provided at the end of the book.
