Before the Computer fully explores the data processing industry in the United States from its nineteenth-century inception down to the period when the computer became its primary tool. As James Cortada describes what was once called the "office appliance industry," he challenges our view of the digital computer as a revolutionary technology. Cortada interprets reliance on computers as a ...

C-T-R, IBM, and Information Processing  
before Computers. The late nineteenth and  
the early twentieth century saw rapid and  
influential technological change that  
justifiably resulted in such names for this  
period as the electrical age, the automobile  
age, and the flight age . Largely behind the  
scenes, this period was also the advent of  
rapid advances in mechanized  
data/information processing – the  
prehistory, if not the early history of, the  
information age.

processing industry was based changed and always gave off an image of newness, the industry's business practices were always very conservative.

## Before the Computer: IBM, NCR, Burroughs, and Remington ...

Drawing on previously unavailable industry archives, the author adds to our understanding of IBM 's early history and offers short corporate histories of firms that include NCR, Burroughs, and Remington Rand. Focusing on the United States but also including comparative material on Europe and Asia, Before the Computer will be a unique source of knowledge about the companies that built office equipment and their enormous impact on economic life.

## James W. Cortada's Before the Computer: IBM, NCR ...

A punched card (also punch card or punched-card) is a piece of stiff paper that can be used to contain digital data represented by the presence or absence of holes in predefined positions. Digital data can be used for data processing applications or used to directly control automated machinery.. Punched cards were widely used through much of the 20th century in the data processing industry ...
