The Mazda MPV was introduced in 1989. It has featured two types of powertrain control modules in the onboard diagnostic (OBD) phase. For earlier versions of the MPV prior to the implementation of OBD II in 1996, the procedure to reset the check engine light is different than later versions of the vehicle. Nowadays, OBD II scanners are quite affordable and can erase the codes without disrupting the stored information the battery provides to the powertrain control module.
