CLIVET WSAT-XEE 352 INSTALLATION, USE & MAINTENANCE MANUAL ...

HYDRONIC SYSTEM The cooling or thermal energy necessary for conditioning is produced at condominial level and then distributed - using cooled or heated water as a vector fluid - in the served areas for which the necessary fresh air is guaranteed. The primary air is supplied by an air handling unit powered by a chiller.

Hydronic system - Clivet spa

With more than 150 different options, such as extra pumps, sound-proof systems, options for transportation, heat recovery, rapid restart and more, it is easy to customise your chiller to your application, environment and needs. We always work with you to deliver a solution that satisfies your requirements.
