This book presents the proceedings of the 6th International Conference on Frontier Computing, held in Kuala Lumpur, Malaysia on July 3–6, 2018, and provides comprehensive coverage of the latest advances and trends in information technology, science and engineering. It addresses a number of broad themes, including communication networks, business intelligence and knowledge management, web intelligence, and related fields that inspire the development of information technology. The contributions cover a wide range of topics: database and data mining, networking and communications, web and internet of things, embedded systems, soft computing, social network analysis, security and privacy, optical communication, and ubiquitous/pervasive computing. Many of the papers outline promising future research directions. The book is a valuable resource for students, researchers and professionals, and also offers a useful reference guide for newcomers to the field.

The article examines Uber ...

This multidisciplinary book focuses on best practices in sustainability research in the Asia-Pacific Region. Drawing links between research, practice, education for sustainability and the needs of industry, it addresses the sustainable development goals (SDGs). The book also presents research undertaken by a wide range of universities on matters related to sustainable development, in order to promote research in this area across multiple disciplines. Four key themes are explored: (1) Education for Sustainability. (2) Sustainable Cities. (3) Sustainable Buildings. (4) Sustainable Infrastructure. This unique book documents and disseminates the wealth of know-how on sustainable development research in the Asia-Pacific Region today. It presents lessons learned and comparative case studies from various countries, including India, China, Indonesia, the Philippines, Bangladesh, New Zealand and Australia.

La 4e de couverture indique : "The 'Uber phenomenon' is the perfect case for a comparative law study: a global phenomenon, impacting almost every country, causing massive disruption of local monopolies and raising many of the same legal questions worldwide. In most countries, taxi companies have long enjoyed monopolies amidst strictly regulated markets. Uber's emergence, combined with the development of a new economic model based on innovative technological tools, has profoundly impacted the industry. It all happened very fast. Uber launched operations in 2009 in the United States and, within a few years, has changed the face of the taxi industry throughout the world. The purpose of this book is to explain how various legal systems reacted and adapted to the disruption caused by the emergence of this new economic model. It is a book about economic regulation, it focuses on how the law regulates - more or less strictly - the actions of economic entities. This book is the collective work of an amazing team of authors - all academics in law or lawyers - from around the world and representing twenty-two countries, namely Argentina, Australia, Belgium, Brazil, Canada, China,

Colombia, Denmark, Finland, France, Germany, Greece, Italy, Japan, Lithuania, Poland, Portugal, the Netherlands, Spain, Switzerland, the United Kingdom and the United States."

This book examines how regulators and policymakers from nine different countries have dealt with Uber, and initiates a legal dialogue between different jurisdictions that could potentially pave the way to a harmonized approach in regulating Uber. The case studies, conducted in Brazil, Germany, Italy, Mexico, Spain, South Africa, Turkey, the UK and the US reveal the case law and regulatory responses that have been adopted in various areas of law. Legal issues relevant to Uber include market regulation, labor law, civil liability, consumer protection, unfair competition and antitrust law. The book thus compares and contrasts the regulatory policy implications of the disruptive innovation created by Uber in the area of transport services. The book starts with a conceptual overview of the legal challenges posed by Uber and concludes with comparative findings based on the individual case studies. In addition to introducing academics and legal practitioners to the theoretical and practical legal problems they may encounter in connection with Uber, the book will especially appeal to policymakers, who can benefit from and compare the experiences of other jurisdictions.
