Help students raise their performance on the Regents Algebra I (Common Core) exam with NYS Finish Line Algebra I. Nearly 300 pages of practice can prepare them with CCLS instruction that follows the curriculum sequence outlined by New York State. Content and organization are developed especially for New York. Topics that are often stumbling blocks for students are covered in detail, starting with the fundamentals. The progression of skills goes from recognizing and understanding forms and processes, to solving equations and inequalities, to modeling equations and graphs to represent real-life situations. Rigorous multiple-choice and constructed-response items give students test-like practice.

Multilingual students, multialectal students, and students learning English as an additional language constitute a substantial and growing demographic in the United States. But these groups of students tend to receive unequal access to and inadequate instruction in Science, Technology, Engineering, Arts, and Mathematics (STEAM), with their cultural and linguistic assets going largely unacknowledged and underutilized. The need for more information about quality STEAM education for culturally and linguistically diverse students is pressing. This book seeks to address this need, with chapters from asset-oriented researchers and practitioners whose work offers promising teaching and learning approaches in the STEAM subjects in K-16 education settings. Authors share innovative ways in which classroom teachers integrate disciplinary reading, writing, discussion, and language development with content knowledge development in STEAM subjects. Also shared are approaches for integrating indigenous epistemologies, culturally sustaining pedagogy, and students' linguistic resources and life experiences into classroom teaching. The value of quality STEAM education for all students is an equity issue, a civics issue, and an economic issue. Our technologically-driven, scientifically-oriented, innovative society should be led by diverse people with diverse ways of approaching and being in the world. This book aims

to make quality STEAM education a reality for all students, taking into account the many perspectives, bodies of knowledge, and skills they bring from a range of cultural and linguistic backgrounds, with the ultimate goal of strengthening the fields that will drive our society towards the future. There are three primary audiences for this book: teachers (both in-service and pre-service teachers), teacher educators (both pre-service preparation and professional learning); and applied researchers. Whatever their current or evolving role, readers are encouraged to use this book and the inquiry questions provided at the end of each chapter as a launching point for their own important work in achieving equity in STEAM education.
