Throughout human history, wars and violence have often been waged in the name of religions and in the name of diverging religious beliefs and belonging. Ironically, though, all religions in their teachings speak of nonviolence and have in common the promotion of peace and justice, namely the respect of human life and dignity, the institution of human rights, the protection of the poor and vulnerable, the freeing of the oppressed, the active elimination of injustice? It seems therefore, that violence and wars would be antithetical to religions; yet they are so frequently used as their justification. Are we then speaking of different "religions"? "Institutional religions," the ones structured by humans and that are brandished to lead violence and wars, become in fact quite foreign to the essence of the religions as they were established by their founders and that they intend to represent; they actually contribute to their destruction. Wanting to reflect on that point, I embarked, a few years ago, on giving voice to local religious individuals, whom I called "Religious Peacemakers," and who, each by living the essential teachings of their particular faith, contributed by their actions to peace and justice. I wanted to prove that their path, irrespective of their original religion, would be similar, and that their diverse faith, instead of separating them, would on the contrary end up uniting them.

An illuminating introduction to a visionary figure in the history of video art and video sculpture Published in conjunction with an exhibition at the Museum of Modern Art, Shigeo Kubota: Liquid Reality sheds new light on the multilayered practice of Shigeo Kubota (1937-2015), who broke new ground with her intrepid video sculptures combining "the energy of electrons" with raw materials like plywood, sheet metal, mirrors and the natural element of water. At the forefront of a generation of artists drawn to the nascent medium of video for its freedom from precedent, Kubota likened newly available portable video technology to a "new paintbrush." She employed early image-processing tools to create otherworldly portraits and landscapes that explored journeys both personal and artistic. Essays by curator Erica Papernik-Shimizu and scholar Gloria Sutton provide an in-depth look at a selection of Kubota's key video sculptures from the early 1970s to the mid-1980s, which pivoted from her Duchampian series to a foregrounding of nature as a means of examining her medium, the world, and her place in it. This richly illustrated publication further contextualizes the artist's work through her writings and drawings, as well as archival ephemera. Viewed through the lens of today's digitally interconnected world, Kubota's revelatory sculptures continue to astonish through their economy of means and poetic juxtaposition of the organic and the electronic. Shigeo Kubota (1937-2015) was a key protagonist in the Fluxus movement before her four-decade career as a video artist began in the early 1970s. She became a pioneer in the medium of video sculpture, working collaboratively to encase video monitors in volumetric forms. In doing so, she liberated video from the constraints of the "TV box" and explored nature as a metaphor for video technology. In parallel, she served as Video Curator at Anthology Film Archives between 1974 and 1983, and facilitated a critical exchange between video artists in New York and Tokyo.
