This Part of JB/T 9008 specifies the basic test requirements and the test contents and methods of each test for electric wire rope hoists. This Part is applicable to electric wire rope hoists that use or lift molten metal in a general environment. The electric hoists that are used in other environments can be referred to.

This resource covers all areas of interest for the practicing engineer as well as for the student at various levels and educational institutions. It features the work of authors from all over the world who have contributed their expertise and support the globally working engineer in finding a solution for today's mechanical engineering problems. Each subject is discussed in detail and supported by numerous figures and tables.

Transfer pricing compliance today features as a high priority item for every multi-national enterprise and tax administration. In 2014

itself, Indian judicial records was enriched with around 400+ reported decisions!! India has become leading contributory in the development of global transfer pricing law. Indian Courts have rendered many thought provoking decisions. However the absence of consistency has only resulted in conflicting or divergent views on most of the issues before them. The application of transfer pricing provisions is intricate and vague like never before. The book comprises of more than 700 India Transfer Pricing decisions covering various issues. This is the second and updated edition of the book Compilation of Transfer Pricing Judgment, now renamed as Analysis of Transfer Pricing Judgments.

This primer is directed at experts and practitioners in intralogistics who are concerned with optimizing material flows. The presentation is comprehensive covering both, practical and theoretical aspects with a moderate degree of specialization, using clear and concise language. Areas of operation as well as technical standards of all relevant components and functions are described. Recent developments in technology and in the markets are taken into account. The goal of this book is to further stronger use of automated guided transport systems and the enhancement of their future performance.
