Designers Against Aids is an international project launched in Belgium in 2004, developed by the non-profit organization Beauty Without Irony, which spreads HIV/AIDS global awareness by using pop culture, celebrities, fashion, and sports to target younger generations, mainly from Western countries. DAA also expresses the need of media coverage on this disease. MTV, New York Post, Vanity Fair, Vogue, Le Monde, Canal+, Cosmopolitan, Knack, El Pais and International Herald Tribune have reported on

The first HIV protease inhibitor, saquinavir, is a peptidomimetic hydroxyethylamine and was marketed in 1995. It is a transition state analogue of a native substrate of the protease. [6] The observation that HIV-1 protease cleaves the sequences containing the dipeptides Tyr-Pro or Phe-Pro was the basic design criterion. [19]

The term “ Designer Baby ” was taken from “ Designer clothing ” which describes the disapproving implication of the transformation of babies. Liberal technophiles, Libertarians, and transhumanists are the people who support it. This process of creating a “ designer baby ” is often questioned because of ethical reasons.

The Pros and Cons Of Having a Designer Baby
