Renowned lecturer and author Alan Watts presents his meditations on the dilemma of seeking your true self. In this collection of writings, Alan Watts displays the intelligence, playfulness of thought, and simplicity of language that has made him so perennially popular as an interpreter of Eastern thought for Westerners. Drawing on a variety of religious traditions, he presents the dilemma of seeking your true self—to become what you are. Once called “the godfather of Zen in America,” Watts also covers topics such as the challenge of seeing one’s life “just as it is,” the Taoist approach to harmonious living, the limits of language in the face of ineffable spiritual truth, and psychological symbolism in Christian thought. This book is part of the Shambhala Pocket Library series. The Shambhala Pocket Library is a collection of short, portable teachings from notable figures across religious traditions and classic texts. “This is the roadmap out of climate crisis that Canadians have been waiting for.” — Naomi Klein, activist and New York Times bestselling author of *This Changes Everything* and *The Shock Doctrine* — One of Canada’s top policy analysts provides the first full-scale blueprint for meeting our climate change commitments — Contains the results of a national poll on Canadians’ attitudes to the climate crisis — Shows that radical transformative climate action can be done, while producing jobs and reducing inequality as we retool how we live and work. — Deeply researched and targeted specifically to Canada and Canadians while providing a model that other countries could follow Canada needs to reduce its greenhouse gas emissions by 50% to prevent a catastrophic 1.5 degree increase in the earth’s average temperature — assumed by many scientists to be a critical “danger line” for the planet and human life as we know it. It’s 2020, and Canada is not on track to meet our targets. To do so, we’ll need radical systemic change to how we live and work—and fast. How can we ever achieve this? Top policy analyst and author Seth Klein reveals we can do it now because we’ve done it before. During the Second World War, Canadian citizens and government remade the economy by retooling factories, transforming their workforce, and making the war effort a common cause for all Canadians to contribute to. Klein demonstrates how wartime thinking and community efforts can be repurposed today for Canada’s own Green New Deal. He shares how we can create jobs and reduce inequality while tackling our climate obligations for a climate neutral—or even climate zero—future. From enlisting broad public support for new economic models, to job creation through investment in green infrastructure, Klein shows us a bold, practical policy plan for Canada’s sustainable future. More than this: *A Good War* offers a remarkably hopeful message for how we can meet the defining challenge of our lives. COVID-19 has brought a previously unthinkable pace of change to the world—one which demonstrates our ability to adapt rapidly when we’re at risk. Many recent changes are what Klein proposes in these very pages. The world can, actually, turn on a dime if necessary. This is the blueprint for how to do it.
