End-of-life care - Wikipedia

- High-quality treatment and care towards the end of life includes:
 - palliative care that focuses on managing pain and other distressing symptoms
 - providing psychological, social and spiritual support to patients
 - supporting those close to the patient.
- How decisions are made

Ethical Issues in Palliative Care

There are often ethical issues that can arise in the context of end-of-life care, particularly when patients and families make decisions regarding the care they will accept or not accept. As nurses, sometimes our morals and values are in conflict with those that our patients have, and this can cause some distress for the nurse.

There isn't a single specific point in an illness when end-of-life care begins; it very much depends on the individual and the progression of their illness. In the case of Alzheimer's disease or another dementia, your loved one's doctor likely provided you with information on stages in the diagnosis.
