Exposing the social and political landscape of homelessness in Fresno, Dispatches from the War Zone offers the reader a rare opportunity to understand this issue from the perspective of the homeless, their allies and an investigative journalist who closely followed this story for more than 10 years. What at first appeared to be builders and developers working with Fresno City Hall and the police to move the homeless to more remote areas of town turns into something else entirely. We find government corruption, a class action lawsuit against the city for its unconstitutional attacks against the homeless and the suspicious death of Pamela Kincaid, the lead plaintiff in the legal action. Originally, it was the federal government's de-funding of affordable housing in the early 1980s that led to today's homeless crisis. The book examines those structural reasons for homelessness but also looks at what grassroots groups in Fresno, working on alternatives, have accomplished. Although the end to homelessness has been elusive for those groups doing business as usual, the paradigm shifts this book suggests give new hope that a better world is possible. There is a pathway to ending homelessness and treating all people with the dignity and respect they deserve.

How our colleges and universities can respond to the changing hopes and needs of society In recent decades, cognitive psychologists have cast new light on human development and given colleges new possibilities for helping students acquire skills and qualities that will enhance their lives and increase their contributions to society. In this landmark book, Derek Bok explores how colleges can reap the benefits of these discoveries and create a more robust undergraduate curriculum for the twenty-first century. Prior to this century, most psychologists thought that creativity, empathy, resilience, conscientiousness, and most personality traits were largely fixed by early childhood. What researchers have now discovered is that virtually all of these qualities continue to change through early adulthood and often well beyond. Such findings suggest that educators may be able to do much more than was previously thought possible to teach students to develop these important characteristics and thereby enable them to flourish in later life. How prepared are educators to cultivate these qualities of mind and behavior? What do they need to learn to capitalize on the possibilities? Will college faculties embrace these opportunities and make the necessary changes in their curricula and teaching methods? What can be done to hasten the process of innovation and application? In providing answers to these questions, Bok identifies the hurdles to institutional change, proposes sensible reforms, and demonstrates how our colleges can help students lead more successful, productive, and meaningful lives.
