complex bears exceptional witness to the cultural traditions of the 12th century in northern Italy's urban society, its organization, religious character, beliefs, and values all being reflected in the history of the buildings.

Read PDF Geotecnica Lancellotta

Theories of surface waves develop since the end of XIX century and many fundamental problems like existence, phase and group velocities, attenuation (quality factor), mode conversion, etc. have been, in part

Read PDF Geotecnica

successfully, solved within the framework of such simple models as ideal fluids[^] or linear elasticity. However, a sufficiently complete presentation of this subject, particularly for solids, is still missing in the literature. The sole

Read PDF Geotecnica

exception is the book of I. A. Viktorov[^] which contains an extensive discussion of fundamental properties of surface waves in homogeneous and stratified linear elastic solids with particular emphasis on contributions of

Read PDF Geotecnica

Russian scientists. Unfortunately, the book has never been translated to English and its Russian version is also hardly available. Practical applications of surface waves develop intensively since a much shorter period of time than theories

Read PDF

Geotecnica

even though the motivation of discoverers of surface waves such as Lord Rayleigh stems from their appearance in geophysics and seismology.

Nowadays the growing interest in practical applications of surface waves stem

Read PDF Geotecnica

from the following two main factors: surface waves are ideal for developing relatively cheap and convenient methods of nondestructive testing of various systems spanning from nanomaterials (e.g.

This volume deals with the most

Read PDF

Geotechnica

modern and topical problems of bridge design. The topics presented allow to tackle both theoretical-analytical as well as technical-constructive aspects of the design problem, pointing out how in the case of bridges, specifically for long span bridges, the

Read PDF

Geotecnica

Two aspects are absolutely inseparable. In modern bridges, reasons of technical and economic feasibility oblige an extreme parceling of the construction process, with the consequent need to revise, with respect to the past, both design concepts as
