features.1

Polymeric foam  
is dispersion of  
a gas in a  
polymer matrix.

It generally  
consists of a  
minimum of two  
phases, a solid  
polymer matrix

# Read Book Handbook Of

and a gaseous phase (blowing agent). Other solid phases may also be present in the foams in the form of fillers.

Polymeric foams may be either expanded rubbers or cellular elastomers or sponges.

Polymer foams  
can be divided

# Read Book Handbook Of

Polymers  
Foams And  
Foam  
Technology  
Klemperer

into either  
thermoplastics  
or thermosets,  
which are  
further divided  
into rigid or  
flexible foams.

The  
thermoplastics  
can usually be  
broken down and  
recycled, while  
thermosets are  
harder to
