New edition of a standard reference revised every four to six years since 1946 (the previous edition was 1997). Intended for both novices and seasoned safety professionals, as well as managers, educators, and professionals in the fields of risk management, loss control, human resources, and engineering, who must formulate safety program goals and objectives. After introductory material, coverage is in sections on loss control information and analysis; safety/ health/ environment program organization, and program implementation and maintenance. The appendices provide sources of help, a bibliography, and answers to review questions. Annotation copyrighted by Book News, Inc., Portland, OR

The NMC have produced standards of proficiency for pre registration midwifery education and those standards have been written in an " academic " language, for higher education institutions. Each student prior to being admitted to the profession must have achieved the proficiencies stated in the NMC publication. The purpose of this book is to provide students with material related to the standards of midwifery education. The students will be able to use the contents of this text and relate it to their own approved programme of midwifery study, as their programme of study would have had to comply with NMC 's requirements. It will help student midwives appreciate how their own programmes have been designed, and why they are required to study and understand some of the subjects they are, or will be studying.

This book, an adaptation of Nancy R. Lee and Philip Kotler ' s highly successful book Social Marketing: Influencing Behaviors for Good, 4th Edition, is structured around the ten-step marketing planning process that trains and encourages those in positions responsible for influencing public behaviors to undertake a systematic and comprehensive approach to behaviour change rather than jumping to the stage of producing just ads or distributing condoms. The book will convince readers when employing social marketing, it takes more than this. The book illustrates the planning process, importance of research, and related concepts through numerous examples that are of high quality and diverse contexts. It is one of the first books to bring together excellent social marketing thoughts related to the Indian situation at one place. Through these discussions, the book proposes new ways to address old problems related to public health, injury prevention, environment protection, community harmony, and financial well-being. In a nutshell, if you want to learn how to fix India ' s problems, this book is for you.
