Far more than a history of the Silk Roads, this book is truly a revelatory new history of the world, promising to destabilize notions of where we come from and where we are headed next. From the Middle East and its political instability to China and its economic rise, the vast region stretching eastward from the Balkans across the steppe and South Asia has been thrust into the global spotlight in recent years. Frankopan teaches us that to understand what is at stake for the cities and nations built on these intricate trade routes, we must first understand their astounding

Roberts. Frankopan realigns our understanding of the world, pointing us eastward. It was on the Silk Roads that East and West first encountered each other through trade and conquest, leading to the spread of ideas, cultures and religions. From the rise and fall of empires to the spread of Buddhism and the advent of Christianity and Islam, right up to the great wars of the twentieth century—this book shows how the fate of the West has always been inextricably linked to the East. to emerge from a period of cultural stagnation, it almost fell to a whirlwind invasion from the East, at which point we meet the Emperors of the Mongol Empire . . . Combining breathtaking scope with masterful narrative control, Paul Strathern traces these connections across four millennia and sheds new light on these major civilizations—from the Mongol Empire and the Yuan Dynasty to the Aztec and Ottoman, through to the most recent and biggest empires: the British, Russo-Soviet, and American. equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and

Robert civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that

With the disastrous U.S. withdrawal from Afghanistan and the rise of India and China on the global scene, this paradigm-shifting book of groundbreaking scholarship helps us envision the future of the Global South by restoring to memory the vibrant though flawed idea of the Third World whose demise, Prashad ultimately argues, has produced an impoverished and asymmetrical international political arena. Marina Amaral has created two hundred stunning images, using rare photographs as the basis for her full-color digital renditions. Dan Jones has written a narrative that anchors each image in its context and weaves them into a vivid account of the world that we live in today. A fusion of amazing pictures and well-chosen words, *The Color of Time* offers a unique—and often beautiful—perspective on the past.
