therapy A must-read for any woman taking synthetic hormones for infertility, birthcontrol, PMS, or menopause • Includes the latest research on using natural progesterone to combat osteoporosis, endometriosis, heart disease, PMS, fibroids, and breast, ovarian, and uterine cancer More and more women are seeking alternatives to synthetic hormones and their harmful side effects. Despite increasing awareness of the dangers of synthetic hormones, over-prescription of estrogen is still rampant, as is confusion among doctors and patients whether the benefits of conventional hormone replacement therapy (HRT) outweigh the risks. This updated fourth edition offers the latest information on how botanical progesterone therapy, also

known as natural HRT, can provide safe, natural relief for many of the problems women face from hormone deficiency, including PMS, fibromyalgia, depression, menstrual irregularity, miscarriages, uterine fibroids, and infertility. Botanical progesterone supplementation can be also extremely effective in relieving hot flashes, insomnia, night sweats, vaginal dryness, and even cancer. The authors sift through misinformation and contradictory studies, warning against corporate-sponsored research in a multi-billion dollar menopausal industry, and guide readers to natural alternatives. This fourth edition also includes new studies regarding the dangers of a diet rich in soy contributing to the onset of premature menopause, as well as thyroid disorders. The dangers

How would you like to earn perhaps \$100,000 annually as a medical or other specialty ghostwriter? You don't necessarily need a degree in science to earn six figures as a ghostwriter. What you do need is to focus or specialize in one subject or area of expertise. If you choose medical ghostwriting, you'd be writing pharmaceutical reports or informational books about research and clinical trials performed by scientists, physicians, and researchers. You could work with pharmaceutical firms, medical software manufacturers, or for public relations firms or literary agents.

You'd be making a lot more than the usual \$10,000 a ghostwriter may receive for writing a career development how-to book. Medical ghostwriters can receive up to \$20,000 per report. Pharmaceutical and clinical trials reports or medical journal articles often are written by ghostwriters. Ghostwriting medical or other factual information is big business. It's one way pharmaceutical manufacturers communicate with physicians. If you want to ghostwrite in this field, get paid to investigate information physicians receive about medicines and interview researchers, you can take the roads leading to steadier writing jobs, document management, or run your own business as a medical, business, or celebrity ghostwriter. Here is the training you need to begin if you
