interfaces and co-simulation for modeling and simulation of hybrid systems. It also presents key advanced features of modeling and automation of calculations using PowerFactory, such as the use of domain-specific (DSL) and DIgSILENT Programming (DPL) languages, and utilizes a variety of methodologies including theoretical explanations, practical examples and guidelines. Providing a concise compilation of significant outcomes by experienced users and developers of this program, it is a valuable resource for postgraduate students and engineers working in power-system operation and planning.

These proceedings gather the best papers presented at the “10th International Scientific and Practical Conference – the 21st Century from the Positions of Modern Science: Intellectual, Digital and Innovative Aspects,” which was organized by the non-profit organization “Institute of Scientific Communications.” The conference took place on May 23–24 in Nizhny Novgorod, Russia, with support from Minin Nizhny Novgorod State Pedagogical University. The chief advantage of these proceedings are their multidisciplinary character – they include articles and empirical studies addressing various fields, including economics, the social sciences, and law. Accordingly, the target audience is broad, covering scholars,
