linked to poverty and environmental degradation.¹⁸ At least 60% of the country's total land area and 74% of the

Philippines Vulnerability To Climate Related Related

The Philippines has always been vulnerable to extreme weather particularly tropical cyclones. Five of the 10 most destructive typhoons have hit the country since 2006, displacing thousands of citizens, resulting in more than 1,000 casualties (The Climate Reality Project, 2016).

Climate Change and the Vulnerability of the Philippines

The Philippines is highly vulnerable to the impacts of climate change, including sea level rise, increased frequency of extreme weather events, rising temperatures and extreme rainfall. This is due to its high exposure to natural hazards (cyclones, landslides, floods, droughts), dependence on climate-sensitive natural resources and vast coastlines where all major cities and the majority of the population reside.
