This anthology of 61 readings by leading twentieth-century writers gives students a solid introduction to traditional philosophical problems. Centering on 12 basic issues, Philosophy provides contrasting perspectives on the issues and demonstrates the relevance of philosophical inquiry in contemporary times.

What can the film Hoosiers teach us about the meaning of life? How can ancient Eastern wisdom traditions, such as Taoism and Zen Buddhism, improve our jump-shots? What can the “Zen Master” (Phil Jackson) and the “Big Aristotle” (Shaquille O’Neal) teach us about sustained excellence and success? Is women’s basketball “better” basketball? How, ethically, should one deal with a strategic cheater in pickup basketball? With NBA and NCAA team rosters constantly changing, what does it mean to play for the “same team”? What can coaching legends Dean Smith, Rick Pitino, Pat Summitt, and Mike Krzyzewski teach us about character, achievement, and competition? What makes basketball such a beautiful game to watch and play? Basketball is now the most popular team sport in the United States; each year, more than 50 million Americans attend college and pro basketball games. When Dr. James Naismith, the inventor of basketball, first nailed two peach baskets at the opposite ends of a Springfield, Massachusetts, gym in 1891, he had little idea of how thoroughly the game would shape American—and international—culture. Hoops superstars such as Michael Jordan, LeBron James, and Yao Ming are now instantly recognized celebrities all across the planet. So what can a group of philosophers add to the understanding of basketball? It is a relatively simple game, but as Kant and Dennis Rodman liked to say, appearances can be deceiving. Coach Phil Jackson actively uses philosophy to improve player performance and to motivate

and inspire his team and his fellow coaches, both on and off the court. Jackson has integrated philosophy into his coaching and his personal life so thoroughly that it is often difficult to distinguish his role as a basketball coach from his role as a philosophical guide and mentor to his players. In *Basketball and Philosophy*, a Dream Team of twenty-six basketball fans, most of whom also happen to be philosophers, proves that basketball is the thinking person's sport. They look at what happens when the Tao meets the hardwood as they explore the teamwork, patience, selflessness, and balanced and harmonious action that make up the art of playing basketball.

In this book, Janet Kourany offers an antidote to the pervasive and pernicious strains in Western philosophy that discount women. Most areas of Western philosophy tend not only to ignore women, but also to perpetuate long-standing antifeminine biases of the society as a whole. It does not have to be this way. Rather than be part of the problem, philosophy can be a powerful force for much needed social change. In this collection of essays by some of the most noted feminist philosophers, Kourany showcases ideas on the newest work of Western philosophy that is benefiting women as well as men. Included here are articles by Eileen O'Neill, Louise Antony, Virginia Held, Susan Okin, Carolyn Korsmeyer, Nancy Frankenberry, Lorraine Code, Janet Kourany, Andrea Nye, and Susan Bordo, all of whom show further directions in which philosophy ought to proceed. This book demonstrates that feminist philosophy is not a separate area of philosophy that can safely be ignored by philosophers not "in" it. Rather, it relates to at least most of the major areas of philosophy, and its gains will stand to benefit all philosophers, no matter what their field.

An inspired gathering of religious writings that reveals the "divine reality" common to all faiths, collected by Aldous Huxley *"The Perennial Philosophy,"* Aldous Huxley writes, "may be found among the traditional lore of peoples in every region of the world, and in its fully developed forms it has a place in every one of the higher religions." With great wit and stunning intellect—drawing on a diverse array of faiths, including Zen Buddhism, Hinduism, Taoism, Christian mysticism, and Islam—Huxley examines the spiritual beliefs of various religious traditions and explains how they are united by a common human yearning to experience the divine. *The Perennial Philosophy* includes selections from Meister Eckhart, Rumi, and Lao Tzu, as well as the Bhagavad Gita, Tibetan Book of the Dead, Diamond Sutra, and Upanishads, among many others.

Annette Barnes offers a challenge to the standard characterization of other-deception and self-deception.

Modern psychology is at an impasse as it searches anxiously for new therapies to address the increasing occurrence of mental illness in contemporary society. In this groundbreaking anthology, leading authors from the perennialist school, including Huston Smith, Seyyed Hossein Nasr, and Frithjof Schuon, draw on the age-old insights of the world's wisdom traditions to argue that modern psychology—behaviorism, psychoanalysis, humanistic and transpersonal psychology—overlooks the specifically spiritual factors contributing to mental health and illness.

How can one believe in an age of doubt? How can we name the mystery of God in human words? Does nature speak of the glory of God? Does science undermine faith? Is the problem of evil unanswerable? In this volume scientists, theologians, philosophers, as well as a historian and social scientist, take seriously the challenge of knowing and speaking about God in an age of doubt and challenge. All New Zealand writers, the authors reflect a variety of styles, inputs, and assumptions from "down under." Some look to answer new atheists directly, others point out links between belief and unbelief in any age. There are essays that show us new ways of reading old texts. Scientists reflect on nature, its signs, and its obscurity. We are confronted also with the mixed picture of belief and unbelief that the last few hundred years reveals to us. Most of these essays have come out of seminars and conferences put on by TANSA (Theology and the Natural Sciences in Aotearoa), a forum for discussion and interpretation amongst scientists and theologians in New Zealand.

With All Your Mind makes a compelling case for the value of thinking deeply about education in America from a historically orthodox and broadly ecumenical Christian point of view. Few people dispute that education in America is in a state of crisis. But not many have posed workable solutions to this serious problem. Michael Peterson contends that thinking philosophically about education is our only hope for meaningful progress. In this refreshing book, he invites all who are concerned about education in America to "participate" in his study, which analyzes representative theories and practical strategies that reveal the power of Christian ideas in this vital area. Peterson addresses the most fundamental questions facing educators, and society in general, such as: What is the purpose of education? What goals do new techniques and methods serve? What kind of person is our educational system supposed to produce? He also explores questions of unique importance to Christians, such as: What is the relation between Christianity and the pursuit of intellectual excellence? How can Christians bring their faith to bear on all areas of knowledge? Can educated Christians significantly influence culture? With All Your Mind examines the key assumptions and implications of influential classical and contemporary

philosophies with respect to education, including idealism, naturalism, Thomism, experimentalism, existentialism, linguistic analysis, and postmodernism. Based on this analysis, Peterson develops an unapologetically Christian philosophy of education in regard to curriculum design, instilling ethics and values, and the nature of teaching and learning. Peterson further advances the merits of an ecumenical Christian philosophy of education by showing how it can be used to analyze key issues in educational theory, such as the relation of general education to liberal learning, the integration of faith and learning, and the demand for professional and technical training. From a practical standpoint, Peterson's approach brings balance and common sense to issues such as the clash between public and private education, the rise of multiculturalism, the changing demographic and psychological profile of America's youth, and the impact of computer and Internet technology. *With All Your Mind* concludes with a stirring vision for education that is embedded in an all-encompassing Christian view of life. Using clear, jargon-free language, Peterson teaches a good deal of basic philosophy while developing a powerful argument for the value of liberal arts education interacting with Christian faith at all levels of schooling.

Do you think that philosophy is an activity for old men in sandals with long white beards? Or people who sit under trees and wait to be struck on the head by apples? If so, then you owe it to yourself to explore the insights of this book. In conversational yet artful prose, James H. Hall reveals the many ways that you can actually enjoy and use philosophy in the course of your everyday experience. Doing philosophy involves critically examining key concepts, presuppositions and implications that are in play across the entire range of human inquiry. *Practically Profound* introduces the enterprise in three basic areas: knowledge and belief (epistemology), human nature (ontology) and the good life (ethics). Emphasizing experience-based arguments, the book demonstrates techniques that readers of all ages can use to enhance their own understanding of themselves and their world. This book is ideally suited to any introductory course in philosophy that takes a problems-based approach, as well as to general readers interested in putting philosophy to work in their everyday lives.
