describe the  
student teaching  
practicum (or work-

[WIL]), which is an  
essential

component of pre-  
service teacher  
education, as the

'elephant in the room'. These authors note that 'the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road'. However, many teacher educators will agree

that this WIL  
component is  
sometimes very  
insufficient in

assisting the  
student teacher to  
develop their own

a teacher. This is  
the ' gap ' that this  
research book  
addresses. Most of  
the chapters in the

The target audience  
is scholars working  
in the fields of pre-

Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice. Focussing its discussion within the context of mathematics education, it argues that while research-

# Access Free Platinum

generated insights can have beneficial effects on learning and teaching, the question of how these effects are to be generated and sustained is far from evident. The question of how to turn research into educational improvement is discussed here in

the context of  
learning and  
teaching hindered  
by poverty and  
social injustice. In  
the first part of the  
book, four teams of  
researchers use  
different  
methodologies  
while analysing the  
same corpus of  
data, collected in a

discourses – that of
