of project management. Bringing project management to life, it avoids being too sterilely academic and too narrowly focused on a particular industry view. It takes a model-based approach towards project management commonly used in

all industries. The textbook aligns with the latest version of the Project Management Institute's Project Management Body of Knowledge (PMBOK®) Guide, which is considered to be the de facto standard for project management. However, it avoids

that standard's verbiage and presents students with readable and understandable explanations. Core chapters align with the Project Management Institute's model as well as explain how this model fits real-world projects. The textbook can be used as
