Anastasi and Urbina's
Psychological Testing is arguably
the worst-written book I have
ever had the displeasure of
reading. The book is rife with
arcane jargon that the authors
never bother to define.

Psychological Testing

Anne Anastasi (December 19, 1908 – May 4, 2001) was an American psychologist best known for her pioneering development of psychometrics. Her generative work, *Psychological Testing*, remains a classic text in which she drew attention to the individual being tested and therefore to the responsibilities of the testers. She called for them to go beyond test scores, to search the assessed individual's history to help them to better understand their own results and themselves.

Review: "Psychological Testing"
by Anne Anastasi. The field of
testing has grown so rapidly that
most contemporary books on
psychological testing are either
extensive and superficial, or
intensive and incomplete.

Anastasi's new college text
achieves a nice compromise
between these extremes. This is
not a compendium of present-day
tests, each briefly described and
briefly criticised.
