Dominick Salvatore once again offers you an opportunity to provide an international perspective to your managerial economics course in his latest edition of the popular Managerial Economics in a Global Economy. Salvatore unifies the theme of managerial decision making around the theory of the firm. This edition offers 28 new case studies and several new chapters that will allow you to present the most current and exciting coverage available in a managerial economics text.

International Economics, 13th Edition provides students with a comprehensive, up-to-date review of the field's essential principles and theory. This comprehensive textbook explains the concepts necessary to understand, evaluate, and address the economic problems and issues the nations of the world are currently facing, and are likely to face in the future. Balancing depth and accessibility, the text helps students identify the real-world relevance of the material through extensive practical applications and examples. The new, thoroughly-updated and expanded edition provides students with a solid knowledgebase in international trade theory and policy, balance of payments, foreign exchange markets and exchange rates, open-economy macroeconomics, and the international monetary system. The text uniquely employs the same graphical and numerical model in chapters that cover the same basic concept, allowing students to recognize the relationship among the different topics without having to start with a new example each time. Clear, straightforward discussions of each key concept and theory are complemented by concrete, accessible, and reliable examples that serve to strengthen student comprehension and retention. Topics include the "Great Recession," the increase in trade protectionism, excessive volatility and large misalignments of exchange rates, and the impacts of resource scarcity and climate change to continued growth and sustainable development.

Reflecting the highly globalized nature of tastes, production, labor markets, and financial markets in today's world, Managerial Economics in a Global Economy is ideal for undergraduate and MBA courses in managerial economics. Adopting a thoroughly global perspective, this text synthesizes economic theory, decision science, and business administration studies, examining how they interact as a firm strives to reach optimal profitability and efficiency in the face of modern constraints.

This well-known book on the subject has stood the test of time for the last 35 years because of the quality of presentation of its text. It has become students' favourite as it provides the latest theories, thoughts and applications on the subject with timely revisions to stay up-to-date all the time. Since its first edition, it has provided complete, comprehensive and authentic text on micro and macro aspects of managerial economics. It has now been revised thoroughly with added interpretations of economic theories and concepts and their application to managerial decisions.

Introduction to International Trade and Finance is written for a one semester course in international economics found in undergraduate business programs. The author, Dominick Salvatore, is very well known and respected in this segment of the market. He presents the material using a real-world perspective in order to help readers gain a better understanding of critical concepts.

-- Instructor's Manual -- Test Bank / Robert F. Brooker.

Step-by-step, authors walk readers through coming up with solutions to exercises in their topic of choice. 964 solved problems Outline format supplies a concise guide to the standard college courses in economics Clear, concise explanations of all economics concepts Complements and supplements the major economics textbooks Appropriate for the following courses: Economics, Principles of Economics, Microeconomics, Macroeconomics Easily understood review of economics Supports all the major textbooks for economics courses

Managerial economics, meaning the application of economic methods in the managerial decision-making process, is a fundamental part of any business or management course. This textbook covers all the main aspects of managerial economics: the theory of the firm; demand theory and estimation; production and cost theory and estimation; market structure and pricing; game theory; investment analysis and government policy. It includes numerous and extensive case studies, as well as review questions and problem-solving sections at the end of each chapter. Nick Wilkinson adopts a user-friendly problem-solving approach which takes the reader in gradual steps from simple problems through increasingly difficult material to complex case studies, providing an understanding of how the relevant principles can be applied to real-life situations involving managerial decision-making. This book will be invaluable to business and economics students at both undergraduate and graduate levels who have a basic training in calculus and quantitative methods.
