Sustainable development in western China: Managing people

Abstract. To realize sustainable development, China has vowed to build the circular economy for many years, but the level of development of this economy differs significantly in various regions of China. This study aims to examine the factors influencing residents' willingness to participate in the circular economy in Western China.

What affects residents' participation in the circular

Philanthropy for Sustainable Development in China 2020. Nov 4, 2020. In 2017, the United Nations Development Programme (UNDP) and China Foundation Center (CFC) jointly launched the "Philanthropy for Sustainable Development in China" initiative. Its purpose is to better understand and explore how China's philanthropic sector supports the ...

Philanthropy for Sustainable Development in China 2020

Basic principle of sustainable development in western China Energy industries are very important to the development of the western region because of the area's abundant energy resources. It has been previously mentioned that the traditional energy road map only develops the exploration and mining industries in western China, which has had little effect on that region's economic growth.

China's green financial development still faces many challenges. Two years on from the launch of China's green finance roadmap, the policy momentum is clear. But a range of practical challenges remain. Finance is still not flowing in sufficient volume because environmental externalities are not yet fully internalised in market prices.

China's green finance strategy: much achieved, further to

China's clear goal of passing the peak of carbon emissions in 2030 and achieving carbon neutrality by 2060 "is a game changer for all industries, especially energy, transportation, manufacturing, agriculture and construction," said Ma Jun, director of the China Green Finance Committee, during a recent sustainable investment webinar hosted by Global Capital.

Sustainable Development in Western China: Managing People

Western China has played a critical supporting role for economic development in China over previous decades, by providing cheap labor and abundant natural resources, but it is time to reap some returns. Research shows a strong correlation between urbanization and economic growth and between urbanization level and per-capita income.
