one.

Designed to introduce students in middle/upper primary to the mathematical concept of algebra and place it in everyday life. Provides activities and problems designed to give students the confidence to reach beyond their current experience and a selection of transparency masters, worksheets and answers are included.

This curriculum programme is for teachers of children in the nine to 10 years group. It shows how to instruct students about nutrition and fitness, and how to get support from school catering staff, fellow teachers and community members.

From geometric and numerical patterns to graphing non-linear figures, 50 reproducible activities make pre-algebra less intimidating by exploring why formulas work rather than just having students memorize them. Students work individually or in groups on lessons covering variables, numerical relationships, equations, and patterns. Teacher pages give you objectives, prerequisite lessons, materials needed, and procedures for each activity.
