Tips on getting the most from mindfulness exercises. When you do any mindfulness exercise, the key steps are: Pay attention - for example, when you shower in the morning, make a special effort to really pay attention to the feel of the water on your skin.; Notice - when your mind wanders, which is just what minds do, simply notice where your thoughts have drifted to.

The rewind technique is a treatment for post-traumatic stress disorder (PTSD), phobias, and anxiety. For many years, severe anxiety-based conditions such as post-traumatic stress disorder or phobias were considered only treatable through long, painful exposure therapy, and sometimes not at all.

The rewind technique - fast phobia and trauma treatment ...

The most widely used technique in the UK is called active cycle of breathing techniques (ACBT). It involves repeating a cycle made up of a number of different steps. These include a period of normal breathing, followed by deep breaths to loosen the mucus and force it up, then coughing the mucus out. The cycle is then repeated for 20 to 30 minutes.
