IEC 60601-1-2:2020 (ed 4.1) - The Changes | **EMC Technologies** In IEC 60601, the test requirements for electrical leakage must be carried out under the worst possible conditions to ensure absolute safety. This is achieved using an elevated mains at 110% of the highest expected Page 29/37

voltage (i.e. at 240V mains this would mean testing at 264V).
Preconditioning of the medical equipment is required prior to testing.
