In The High-Velocity Edge , Dr. Steven Spear decodes the magic and gives us insights into how these “ high-velocity ” organizations have become who they are. In a nutshell, Spear ’ s conclusion is, “ It is how the uncertainty, the expectations, and the unexpected are managed that separates the high-velocity organizations from their pursuers and proves to be a source of sustainable competitive advantage. ” .

~~Book Review: The High Velocity Edge | It's a Nice Life.~~

Spear argues that High-Velocity Edge companies are learning organizations. Organizations that continually look at the whole system to see what needs to be improved, clarified and/or cut. By considering if each action is necessary, if it is leading to near-misses or even tragic circumstances, these companies save time, resources and empower their employees to create value and not just put out fires.

Donald M. Berwick, M.D., M.P.P., President and CEO, Institute for Healthcare Improvement About the Book How can some companies perform so well that their industry counterparts are competitors in name only? Although they operate in the same industry, serve the same market, and even use the same suppliers, these extraordinary, high-velocity organizations consistently outperform all the competition—and, more importantly, continually widen their leads. In *The High-Velocity Edge*, the reissued edition of five-time Shingo Prize winner Steven J. Spear's critically acclaimed book *Chasing the Rabbit*, Spear describes what sets market-dominating companies apart and provides a detailed framework you can leverage to surge to the lead in your own industry. Spear examines the internal operations of dominant organizations across a wide spectrum of industries, from technology to design and from manufacturing to health care. While he investigates several great operational triumphs, like top-tier teaching hospitals' fantastic improvements in quality of care, Pratt & Whitney's competitive gains in jet engine design, and the U.S. Navy's breakthroughs in inventing and applying nuclear propulsion, *The High-Velocity Edge* is not just about the adoration of success. It also takes a critical look at some of the operational missteps that have humbled even the most reputable and respected of companies and organizations. The decades-long prominence of Toyota, for example, is contrasted with the many factors leading to the automaker's sweeping 2010 product recalls. Taken together, these multiple perspectives and in-depth case studies show how to: Build a system of "dynamic discovery" designed to reveal operational problems and weaknesses as they arise Attack and solve problems when and where they occur, converting weaknesses into strengths Disseminate knowledge gained from solving local problems throughout the company as a whole Create managers invested in developing everyone's capacity to continually innovate and improve Whatever kind of company you operate—from technology to finance to healthcare—mastery of these four key capabilities will put you on the fast track to operational excellence, where you will generate faster, better results—using less capital and fewer resources. Apply the lessons of Steven J. Spear and gain a high-velocity edge over every competitor in your industry.

fruit at the top of the funnel, build massive lead lists using ICP and TAM, utilize multiple prospecting strategies, perfect your follow-ups, nurture leads, outsource where advantageous, and much more. Build, refine, and enhance your pipeline over time, close deals faster, and use the right tools for the job—this book is your roadmap to fast and efficient revenue growth. Without a reliable process, you're disjointed, disorganized, and ultimately, underperforming. Whether you're building a sales process from scratch or looking to become your company's rock star, this book shows you how to make it happen. Identify your Ideal Customer and your Total Addressable Market Build massive lead lists and properly target your campaigns Learn effective hacks for messaging and social media outreach Overcome customer objections before they happen The economy is evolving, the customer is evolving, and sales itself is evolving. Forty percent of the Fortune 500 from the year 2000 were absent from the Fortune 500 in the year 2015, precisely because they failed to evolve. Today's sales environment is very much a "keep up or get left behind" paradigm, but you need to do better to excel. Hacking Sales shows you how to get ahead of everyone else with focused effort and the most effective approach to modern sales.

Win the war for talent by building an army of ready-to-deploy candidates An employee leaves and you post the open position. Resumes trickle in. You interview a few candidates. No one fits the bill. The next thing you know, three months have passed and that desk is still empty . . . Nothing drives business success like a staff of talented, productive employees. So why accept a hiring process that fails you time and time again? Well, there's one person who doesn't: Scott Wintrip. And in High-Velocity Hiring, he provides the tools and systems for creating a hiring process designed for today's fast-paced, talent-deficient landscape. Using the proven methods Wintrip has applied at some of today's more forward-thinking companies, you'll hire top employees faster—and smarter. High-Velocity Hiring replaces the old, worn-out way of hiring with the simple but revolutionary approach of actively cultivating top talent before positions open. The old way is slow and inefficient. Wintrip's way is dynamic and proven-effective. You'll enrich and maintain a flow of high-quality candidates, harness this flow by identifying the most talented people, and channel it into a pool of ready-to-hire prospective employees. More than ever, hiring the best people requires foresight, planning, alertness, and decisive action. With High-Velocity Hiring, you have everything you need to seize the high-ground in the war for talent and maintain it for long-term growth and profitability.

This Element deals with the know-how and show-how to accomplish high velocity business operations. The basis of these operations is real-time data and low latency processing. Relevant applications are pervasive due to the emerging technologies of IoT, 5G, AI and data analytics. This Element explores theories and methods of configuring, formulating and implementing high velocity business operations with properly designed and developed platforms and processes. Current mobile transformation is enabling the unwiring of businesses, de-territorializing them, and creating more opportunities for these operations. High velocity business processes increase throughput and efficiency, offering first-mover advantage. They also provide location-independence due to use of mobile platforms and devices (smartphones, tablets and wearables). This Element present mobility as a critical attribute of high velocity business operations, taking advantage of world-wide resources and expertise with well-designed mobile platforms and their data.

The data shows that senior executives today face a stark reality: Sales talent is increasingly difficult to find. Traditional selling strategies no longer work. And salespeople today are more distracted and aimless than ever before. To give their organizations true staying power in this tumultuous new market, company leaders must fundamentally change the way they look at sales-or else succumb to the competition. What today's senior leaders need is a high-velocity sales organization: an organization with the right performers, strategy, and infrastructure in place, allowing it to dramatically increase sales by converting more opportunities at higher prices to more prospects. Drawing on hard data, comprehensive research, and the latest science behind selling, Marc Wayshak has developed a system for building these fully sales-driven organizations. The High-Velocity Sales Organization brings together Wayshak's cutting-edge insights as a leading sales consultant with the latest data to create a step-by-step formula for accelerating a sales-driven company culture-from the top down. This guide for senior executives lays out the exact processes company leaders must implement to achieve the three pillars of a high-velocity sales organization: Performers-Learn to identify, recruit, and retain top performers for a consistent flow of A-player salespeople-and far fewer costly mis-hires Strategy-Develop and implement a self-improving, highly adaptive sales strategy that sets your salespeople apart from the competition Infrastructure-Establish a clear system for building out the right sales processes, with the most effective technology, to hold sales teams accountable

Outlearning the Wolves 3rd Edition: Surviving and Thriving in a Learning Organization Robert Fritz calls this fable a true classic that demonstrates how "a good story can be one of the best sources of profound change." Now available in 11 languages; the book continues to find new audiences and win the hearts of those who embrace its lessons. Yet; it ' s fair to say that the central message of this deceptively simple tale is almost as radical today as it was when Pegasus first published it 10 years ago. As Fritz observes; it is still the rare organization that appreciates the insight that the sheep in the story discover: Individual learning; good as it is; does not necessarily translate into organizational learning. The learning must become collective." That ' s why this book continues to be such an important resource for innovators determined to confront the wolves of complacency in their organizations by stimulating people ' s natural desire to creatively improve their results together.

"The Flow System shows how to generate and nurture self-organizing teams that mobilize the full talents of those doing the work to cope with dizzying change and complexity, while also drawing on the contributions of those for whom the work is being done--the customers."--Steve Denning, author of The Age of Agile
"Organizations that pull off this triple helix trick of thinking about the complexity of their systems and the environment in which they're operating, distributed leadership to engage the collective intelligence and creativity of the organization, and building teams of teams so the whole is greater than the sum of the parts, have a good chance of keeping up and staying ahead."--Steve Spear, MIT Sloan School senior lecturer, author of The High Velocity Edge "The Flow System's Triple Helix provides many of the tools and ways of thinking we will need to do that; it is agile without being doctrinaire about Agile."-- David Snowden, creator of the Cynefin Framework, Chief Scientific Officer of Cognitive Edge
