~~UNIFIED PHYSICS FOR B.SC
FIRST SEM ENGLISH Paperback
—1—~~

In physics, a unified field theory (UFT) is a type of field theory that allows all that is usually thought of as fundamental forces and elementary particles to be written in terms of a pair of physical and virtual fields. According to the modern discoveries in physics, forces are not transmitted directly between interacting objects, but instead are described and interrupted by intermediary

The paper Unified field theory (UFT) [1] opened a new chapter of physics. The main model of UFT is Torque Grids that unify Space, Time, Energy and Force. The configuration of invisible particles [2] and structure of the grand universe [3] can be logically induced. Visually, the universe can be modeled as single Torque Grids' hierarchy. A simple UDP Java program can be used to prove the space ...
