Water resources - Wikipedia

Attendees at the EWRI Congress in Milwaukee will have the opportunity to share their research on issues affecting the environment and the policies relating to water resources. As a water community, we will focus on using our existing knowledge, combined with fresh ideas to maximize resources and develop best practices as we strive for a healthy future environment.

Home | EWRI Congress

Water resources engineering focuses on the quantity of water, while environmental engineering focuses on issues of pollution and waste management. These fields deal with a wide range of natural and manmade problems that exist in both undeveloped countries and highly technological societies.

Water Resources and Environmental Engineering - World ...

Water is a vital elixir for all living beings. Although it is a renewable resource, scarcity of quality water is felt in many parts of the world. We need water to grow food, keep clean, generate electricity, control fire, and last but not the least, we need it to stay alive. World Ocean water covers about 75 percent of the surface of the earth.
