encompasses nearly 9,000 painters and 90,000 paintings in more than 1,700 separate collections. The book includes as well pictures that are now lost, some as a consequence of the Second World War and others because of de-accessioning, mostly from 1950 to about 1975 when Victorian art was out of fashion. By listing many tens of thousands of previously unpublished works, including around 13,000 which do not yet have any form of attribution, this book becomes a unique and indispensable work of reference, one that will transform the study of British and Irish painting.

Obesity has become the most common chronic disease of the present day, with significant increases in prevalence in populations across the world and all age groups. This has resulted in a dramatic increase in obesity-related metabolic and cardiovascular complications, making it an important public health issue. Type 2 diabetes associated with obesity or 'diabesity' is today the most common form of type 2 diabetes. It is also associated with a number of other cardiovascular risk factors, which constitute the metabolic syndrome. Effective management of 'diabesity' is

File Type PDF York 2001 Exercise Manual

crucial to the reduction of morbidity and premature mortality due to cardiovascular disease. This book comprises chapters written by leading international experts on various aspects of obesity-related diabetes. As a practical reference guide, it is suitable for all professionals with an interest in this field. Emerging problems such as childhood 'diabesity' and the impact of obesity on polycystic ovary syndrome will be of interest not only to paediatricians and endocrinologists, but also to general practitioners and other healthcare professionals. The contemporary approach to the clinical assessment of obesity and its management in both primary
